DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04 January 2008 has been entered.
2. Claims 19 and 20 have been presented for examination.

Response to Arguments

3. Applicant's arguments with respect to claims 19 and 20 have been considered but are moot in view of the new grounds of rejection.

Drawings

4. The drawings were received on 12 October 2006. These drawings are accepted by the Examiner.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 19 and 20 are rejected under 35 U.S.C. 102(a) and 35 U.S.C. 102(e) as being anticipated by U.S. Patent Application Publication No. 2003/0046545 A1 to Merkle, Jr. et al., hereinafter Merkle.

7. The Examiner has reviewed the parent applications (09/631,585 & 09/608,886) of the instant application, and has concluded that support for the limitations under 35 U.S.C. 112 of claims 19 and 20 did not appear until the instant application. This is evident by the addition of paragraphs 00079-00083 on pages 31-33 of the specification filed on 21 August 2003 (paragraphs 0082-0086 of U.S. 2005/0050343 A1 – the published version of the instant application). Since support for the claim limitations of claims 19 and 20 first appears in the instant application, filed on 21 August 2003, the claims are not afforded either priority date from the two parent applications. Therefore, Merkle qualifies as prior art under 35 U.S.C. 102(a) since it was published five months priority to the instant application and 35 U.S.C. 102(e) since it is an earlier filed, published patent application.

8. Claims 19 and 20 are rejected as being unpatentable in lieu of claims 1 and 56 of Merkle, respectively.
